

# MPOWER™ ECHELON2 CONSOLE

## WE'RE TAKING EVERY MEASURE TO DELIVER THE BEST CONSOLE IN THE INDUSTRY.

At Schwinn®, we're committed to designing bikes that deliver both an authentic experience to riders and lasting value to gym and studio owners. It's a dedication that drove us to developing the most feature-rich console in the industry today. With "measurement" being an added tool continually gaining momentum in cycling rooms, our new MPower™ Echelon2 Console gives motivating rider feedback which changes the way members ride and how classes are coached, ultimately enhancing the member experience. The MPower™ Echelon2 Console is our smartest design yet – and an even smarter choice for your gym.

## MPOWER™ ECHELON2 BENEFITS

The NEW console, combined with the Watts Upgrade, offers a number of enhancements, making it a valuable and reliable tool in all types of cycling facilities.

- **User Metrics** – Watts, Time, Kcal, Cadence (RPM), Distance, and Telemetry Heart Rate are all measured.
- **Data Capture** – Two ways to memorialize workout data: USB Memory Stick and ANT+ Wireless Devices.
- **Stage & Totals** – Stage measurements can be reset during a ride, making it easy to track multiple in-class segments for time, distance and AVG/MAX power. Totals track the same measurements for the course of the entire ride.
- **Readability** – Riders enjoy a large display and characters that are easy to read.
- **Functionality** – Push-button start-up and AVG/MAX values are accessible anytime during the ride with a separate, dedicated button.
- **Reliability** – The system does not rely on a wireless signal for communication, eliminating connectivity issues.
- **Serviceability** – A plug-and-play design allows for simplified installation, and the batteries are housed in a single location.
- **Gear Function** – Optional display component of resistance level with a numeric “gear” displayed on the console.

MPower™ Echelon2 consoles can be easily mounted to all Schwinn AC bikes. The AC Performance Plus comes fitted for internal cable routing, the AC Sport requires an upgrade kit for external routing.

### SCHWINN EDUCATION

With more than a decade of leadership in cycling education, the industry looks to Schwinn for the latest in both product and instructor education. The Schwinn Education Program provides access to a number of exclusive tools, including the Schwinn Cycling Coach's Pyramid. This proven innovation unlocks the magic of coaching and enables instructors to create a foundation for classes that deliver the ultimate group exercise experience, class after class, ride after ride. We have created a custom Schwinn Education course specifically designed to help instructors integrate the Echelon console into their classes in the most motivating ways possible.

The unique features and readouts of the MPower Echelon Console were developed to elevate the Schwinn rider experience by providing measurements with structure, meaning and energy. Echelon provides immediate feedback and unique training opportunities, helping riders improve fitness in ways they can actually see. With the new Schwinn MPower Echelon Console, you'll quickly find that Measurement equals Motivation.
